Senior Software Engineer

PROFILE:

- Demonstrated experience in the back-end/front-end web development, large code base management, TDD;
- Expert in working with legacy code: maintenance, refactoring;
- Strong focus on improving productivity of a team;
- Confident in working with different languages and technologies;
- Pragmatic, goal oriented, demonstrated ability to meet and exceed all performance metrics.

TECHNICAL SKILLS:

Ruby, Ruby on Rails, JavaScript, React.js, Node.js, Python, SQL, MongoDB, Redis, TDD, git, Linux, RabbitMQ, Memcached, Docker, AWS

WORK EXPERIENCE:

AIDA Cruises, Digital Unit, Hamburg, Germany (March 2016 - Present)

Senior Software Engineer

- Volunteered to drive a common infrastructure topic inside the unit
- Conducted an Agile Health Check in the unit to highlight possible pain points and find solutions
- Set up AWS infrastructure with Docker/Swarm
- Hands on in product development / maintenance

XING AG, Hamburg, Germany (July 2014-March 2016)

Software Engineer

- Participated in a development of a new product, made valuable technical and product suggestions;
- Took over a tech lead role in a migration project;
- Introduced a number of improvements to a development process and tooling;
- Organized a weekly "hack" event at the company
- "The Innovation Week" org. member, organiser and an active speaker at an internal Open space event.

WaysGo Inc., San Francisco, CA, USA 2014 (Feb-July)

Software Engineer (remote)

- Proposed React.js and implemented a non-trivial UI on top of it

EarthTV GmbH, Berlin, Germany (2012-2014)

Ruby Developer (remote)

- Researched and analysed performance of a number of combinations of servers/ruby implementations
- Proposed JRuby / Webmachine / Mizuno (Jetty) as the most suitable for performance and needs;
- Developed core REST API for managing video clips meta information
- Traffic: Up to 10.000 concurrent visitors

ShowMojo Inc., Chicago, IL (2012-2014)

Ruby on Rails Developer (remote)

- Started with an undeveloped legacy code base (>40000 LOC of ruby), refactored the most churn bits of it
- Managed a team of three developers as a lead developer (provided consultancy, code review, server administration)
- Converted the single-user application into a multi-user app with role-based system
- Performed multiple vital upgrades of Ruby, Ruby on Rails, PostgreSQL

Intecmedia, LLC. Krasnoyarsk, Russia (2010-2012)

Lead Python, PHP Developer

- Supervised and mentored junior staff (code review, technical interviews and hiring)
- Provided technical consultancy to project managers / clients

2007-2010

PHP, Perl, Python developer
